

ENERGY MANAGEMENT SYSTEM SOLUTIONS

At CBRE | FacilitySource, we keep our clients UP. AND RUNNING. by leveraging world-class technology and our Elite Network of Service Providers. Our end-to-end facilities management solutions includes interior services, exterior services, capital projects, and more. Did you know our end-to-end solution also includes an Energy Management System (EMS) Support?

For over 10 years, we've been strategizing and perfecting the optimal EMS solution. Now managing over 12k facility locations, our EMS solution includes:

- Continuous Monitoring
- Remote Troubleshooting
- Real-Time Enterprise Visibility
- Live Dashboard for Desktop and Mobile
- 24/7/365 Monitoring Center
- Work Order Management
- Work Verification
- Predictive Analytics

WHAT IS EMS?

In the facilities industry, an Energy Management System is a system that is controlled by a variety of electrical utility grids and computers. EMS allows for monitoring, controlling, and optimizing performance of various systems, such as HVAC and lighting, to promote energy efficiency within a facility.

Why Choose CBRE | FacilitySource for Your EMS Needs

By combining energy data, repair spend, and maintenance spend, we can pinpoint which asset is costing you more to maintain rather than replace

24/7/365 EMS performance monitoring by our Monitoring Center

We provide data, analytics, and insights on energy consumption for lighting and HVAC system performance

Automate your HVAC and lighting systems and never wonder, "Did I leave the lights on?" again

We leverage live data to determine what's happening in your location before a problem arises- reducing maintenance spend and emergency calls
